Abstract (en)
[origin: WO2011064078A1] The invention relates to a refrigeration appliance (1) having a body (2) having a coolable interior chamber, a door leaf (3) which is hinged to the body (2) for opening and closing the interior chamber and having an opening (6) and an additional door leaf (7) hinged on the door leaf (3) for opening and closing the opening (6). According to the invention, the additional door leaf (7) has a main carrier (11) and a front cover (10) forming an outer skin (10a) of the additional door leaf (7) and fastened to the main carrier (11) which cover is extensively bent at a right angle in the edge region (10b) thereof. The main carrier (11) has an extensively arranged stepped recess (11a) to which the edge region (10b) of the front cover (10) is fastened, by the side thereof pointing in the direction of the main carrier (11).
