Abstract (en)

[origin: EP2505318A2] The adapter has an adapter part (18) arranged at a blade (14) made from plastic or aluminum, and another adapter part arranged at a handle. The latter adapter part has grooves, and the former adapter part has springs (26) for producing fixed connection with the grooves. A stop limits the insertion of the springs into the grooves, where the adapter parts are made from plastic. The former adapter part has a concavely-curved surface (24). A curved axis of the curved surface extends in the direction of the handle, where the grooves extend in the direction of longitudinal extension of the handle.
