Abstract (en)

[origin: EP2505735A1] The smoke pressure control system has air supply fan (2) and control valve device (3) which are attached in stair space (1). The control valve device is provided with a control valve which is opened and closed corresponding to pressure fluctuations. Several air discharge openings (4) are provided in stair space, which are connected over a common supply air shaft (5) with respect to air supply fan. An independent claim is included for smoke pressure control method.
