Abstract (en)
[origin: EP2506080A2] An image-forming system includes an image-forming unit for forming an image on a sheet, a sheet feeding unit including at least a pair of feed rollers for feeding the sheet on which the image has been formed, a cutting unit for cutting away a waste portion of the sheet, and a controller. The controller is operable to controlling the sheet feeding unit for a cleaning operation of the pair of feed rollers, before the waste portion is cut away, so as to hold the sheet and drive the pair of feed rollers in contact with the waste portion of the sheet. According to the image-forming system, the pair of feed rollers can be easily cleaned up by effectively utilizing the waste portion.
