Abstract (en)
[origin: EP2506229A1] A container anti-intrusion sensor device (4), the anti-intrusion sensor device (4) being equipped with a support element (7), fastening means (8) for fastening the support element (7) to a wall (2) of a container (1) in a removable manner, vibration sensor means (5) and light radiation sensor means (6) mounted on the support element (7), an electronic unit (9), which is mounted on the support element (7) and is electrically connected to said sensor means (5, 6) to receive and process electrical signals from the sensor means (5, 6) for determining the occurrence of a break-in on the container (1) and consequently generating an alarm, and power supply means (10, 5) for the electronic unit (9) mounted on the support element (7).
