Abstract (en)

[origin: WO2007132233A2] A method of managing configuration of user equipment that has a configuration database modifiable with configuration data in a first format, and a communications unit for receiving configuration data in a second format is described. The method comprises storing a user agent at the user equipment; providing received configuration data in the second format to the user agent; using the user agent to transform the configuration data into the first format in the user equipment; and modifying the configuration database with the configuration data in the first format.
