Abstract (en)

[origin: WO2011066937A1] The invention relates to a composition having an HLB value greater than 10, which acts as an emulsifier for a solubilisate of at least one raw material and/or active substance which is insoluble or only soluble with difficulty in water, and one or more sucrose esters of an edible fatty acid (E473) in combination with at least one constituent which is a carrier of at least one OH group, in particular water and/or ethanol and/or glycerol.
