Abstract (en)

[origin: US2011108042A1] Registered banded wrapper, cigarettes using that wrapper paper, and methods of making cigarettes with that banded paper result in banded regions of cigarette paper which begin at substantially the same location on each cigarette. With the banded region positioned at a preferred predetermined distance from the end of the cigarette, cigarettes made with such paper exhibit a consistent and improved ignition propensity compared with random or quasi-randomly positioned banded regions.
