Abstract (en)

[origin: WO2011067664A2] A process for coating a surface (6) of an article (2); the process provides spreading on the surface (6) particles (5) having a size from 20 µm to 11 µm, providing heat up to at least 100°C and then compressing and, simultaneously, cooling below 50°C; a resistant layer (L) bound very strongly to the article is obtained in a simple and cost-effective manner.
