Abstract (en)

[origin: WO2011067014A1] In a device comprising a first component (100) made of plastic and a second component (200) having a recess (210), the first component is at least partially arranged in the recess. The second component comprises an opening (220), which extends from an exterior of the second component to a first section of the first component arranged in the recess. The opening is arranged at an angle to the extension direction of the first component. The first component comprises a formed section (120) that is arranged in the opening.
