Abstract (en)

[origin: EP2330052A1] The sales unit has a wrapping (5), where a reactive hot-melt adhesive (1) is present loosely in individual portions in the wrapping. The wrapping is sealed in relation to liquid water, particularly in relation to water vapor. The wrapping is made of a metal foil, particularly an aluminum foil, a coated aluminum foil, particular a polyethylene coated aluminum foil. The reactive hot-melt adhesive has isocyanate-terminated polyurethane prepolymer, which is manufactured by reaction of suitable polyols with an excess of diisocyanates. An independent claim is also included for a method for utilizing a reactive hot-melt adhesive.
