Abstract (en)

[origin: WO2011067675A2] A system, method, device, computer program, user interface, and apparatus for transmitting content to a user device, the method including acts of receiving user information from one or more sensors; obtaining user history information comprising one or more of historical location information and historical activity information; determining, based upon the user information and the history information, whether a switching event has occurred for a user of the user device; and delivering a notification if a switching event is determined to have occurred.
