Abstract (en)
[origin: EP2508262A1] The present disclosure provides a method of providing a fuel for a plant for the combustion of a fossil fuel, such as powdered coal, comprising the step of disintegrating wood pellets in a disc refiner comprising refining discs comprising a base composed of a material having a first hardness and teeth composed of a material having a second hardness that is higher than the first hardness, which teeth are partially embedded in the base and protrude therefrom, to obtain the fuel. A corresponding system is also provided.
