Abstract (en)

[origin: EP2508275A1] The pressing tool has two pressing elements (10,12) that are movable relative to each other and dies (16,18) that are supported by the pressing elements. A drive unit is provided for moving the dies. A fixing element (22) is provided at one of the dies for reducing the relative motion between the latter die and the press fitting in the area of fixing element. An independent claim is also included for a press fitting with an inner contour.
