Abstract (en)
[origin: EP2508658A1] The clothing (1) has a tooth (2) provided with a tooth front surface (3), a tooth back surface (4) and a tooth tip (5). The tooth back surface exhibits a certain distance (A) to the tooth front surface and forms a tooth intermediate space (7), which is extended from a tooth root surface (6) to the tooth tip. The tooth has embossments (8, 9) between the tooth tip and the tooth root surface on the tooth back surface and the tooth front surface. The embossments reduce the distance between the tooth back surface and the tooth front surface.
