Abstract (en)

[origin: EP2508663A1] A sewing machine (10) comprises a head (14) and a base (12) in which at least one crochet (28) is comprised that can rotate and has a vertical axis of rotation when in a working position where the sewing machine is sewing a cloth. The machine (10) comprises a movable block (20) in which the crochet (28) is received, so that by moving said block, the crochet and the spool received in said crochet are easily reachable by the operator for a simple check or to change the spool itself.
