Abstract (en)  
[origin: EP2508826A2] The separating device (10) has a displaceable separating region (16) for dividing inner space of a storage container (8) and a support element (18) for supporting the separating region on a supporting area of the storage container. The supporting element has an elongated support surface (37) for supporting on the supporting area. The elongate support surface is extended in a direction transverse to the separation region. A fixing element has an antiskid component (52) to avoid slipping. An independent claim is included for a storage container, which has a wall area.
