Abstract (en)  
[origin: WO2011061507A1] A high energy impact resistant, high security fence panel (2) for providing a high level of security and/or enclosing high impact sports areas, comprises a plurality of first members (4) which are arranged substantially parallel to one another so that they do not cross one another and a plurality of second members (6) which are arranged substantially parallel to one another so that they do not cross one another. The first and second members (4, 6) are arranged to cross each other and are interconnected. The interconnected members (4, 6) have a tensile strength of at least 800 N/mm<sup>2</sup> and are interconnected with one another by means of the members (4, 6) being woven together.
