Abstract (en)

[origin: WO2011070012A1] The invention relates to a vehicle body (100), in particular of a passenger car, having at least one trim part disposed on the exterior, wherein said trim part comprises at least one integrated functional element. According to the invention, the vehicle body (100) comprises at least one belt-like section (200) on the exterior, comprising at least one such trim part. The invention further relates to a corresponding trim part.
