Abstract (en)

[origin: WO2011069882A1] The system (2) for an opening leaf (22) of a vehicle comprises: at least one upstream member (60), at least one spring (162), and at least one downstream member (64) capable of causing the opening leaf to open. The spring extends in series between the upstream member and the downstream member with reference to a kinematic chain along which a command to open the opening leaf is transmitted from the upstream member to the downstream member.
