Abstract (en)
[origin: WO2011069745A1] The invention relates to a fuel injection valve, comprising a multi-hole nozzle having a plurality of injection holes through which the fuel is injected, wherein the multi-hole nozzle comprises at least two injection holes having different injection hole diameters. The invention further relates to a method for producing a multi-hole nozzle having a plurality of injection holes by means of laser drilling wherein at least two injection holes have different injection hole diameters.
