Abstract (en)
[origin: WO2011069708A1] The invention relates to a pump arrangement (1), which is used in particular for fuel injection systems of air-compressing, auto-igniting internal combustion engines, comprising a high pressure pump (2), which has a high pressure pump shaft (7), and a gear pump (3), which has a gear pump shaft (8). The invention further relates to a coupling (12) which has at least one sacrificial surface (21, 22) and is provided between the high pressure pump shaft (7) and the gear pump shaft (8).
