Abstract (en)  
[origin: WO2011069658A1] The invention relates to a key and to a mechanical module, in particular for a key, comprising a body mounted on said body, the body including a first body portion and a second body portion, the first and second body portions being mechanically attached together via shape assembly, the first body portion including a base element and a complementary element, the complementary element making the shape assembly with the second portion, and the complementary element and base element being connected via a bonding or welding link.
