Abstract (en)

[origin: EP2510794A2] The plant (105) has a display device with display areas for displaying products (130-1) of a cutting machine (120-1). A selection unit selects output product of the cutting machine which are shown in one display area, and assigns the selected output product to other display area. A control instruction unit provides control commands for the cutting machine for cutting the selected output product associated with other display area. An independent claim is included for machine readable medium storing program for controlling production plant.
