Abstract (en)
[origin: EP2510852A2] The cleaning device (1) has a housing which is covered by a housing cover (4), and a receiving container (3) which is arranged in the housing. A container cover (2) covers the receiving container. A locking element (5) is attached to the housing. A locking element (6) is attached to the receiving container, and is made to cooperate with the locking element (5) such that the locking elements are latched during closing state of the housing cover while the locking element (6) is latched with the container cover.
