Abstract (en)
[origin: EP2511187A2] The container (1) has a container wall enveloping a filling material, where the wall has a front wall (2) and rear wall (3). The layers (7,8) are pre-determined in a head area (6) of the container, where the layer is connected by a section by a closing unit enclosing the containers below the head area section. The head area is arranged adjacent to the area equipped with an aperture (12). An independent claim is also included for a method for processing a web material for packaging containers made up of plastic foil, particularly for foil bag with standing base.
