Abstract (en)  
[origin: EP2511213A1] The wire transporting system (11) comprises a first conveyor device comprising a first set of conveyor elements (21), and a second conveyor device comprising a second set of conveyor elements (31). The conveyor devices are being movable towards each other to place both the set of conveyor elements into a wire transport position. The conveyor devices are moved away from each other to place both the set of conveyor elements into a wire release position. Both the conveyor devices comprise respective endless belts (20,30) connected to respective pulleys (22,23). An independent claim is included for wire transporting method.
