Abstract (en)

[origin: EP2511448A1] Roof (1) provided with a safety device (3). The safety device (3) consists of a base plate (7) to be placed underneath the roof covering (2) of the roof (1) and a supporting part (4) situated above the latter. The supporting part (4) is clamped to the base plate (7) when the roof covering (2) is placed in between. The base plate (7) can be positioned underneath the roof covering (2) by making a cut in the latter. The supporting part (4) may be provided with a sealing covering (6) in order to seal such a cut after it has been made. In addition, the supporting part (4) may comprise a profile to which a pivotable attachment means is fitted for attaching a safety line thereto.
