Abstract (en)  
The device (1) has a reception housing (5) being provided in ground (6) and receiving a support unit (8) and a retractable roof structure (2). The support unit receives carrying units and moves between top and bottom positions along a vertical direction (III-III) by a movement unit. The structure is moved in translation between covering and retracted positions along a longitudinal direction (II-II) in the top position. The structure rests on the ground in the covering position and on the support unit in the retracted position, and is partially arranged in the housing in the bottom position.

Abstract (fr)  
Dispositif de rangement (1) d'une structure de toiture escamotable (2) comprenant au moins un élément couvrant (3a-3d) déplaçable en translation. Le dispositif de rangement (1) comprend un logement de réception (5) prévu dans le sol (6) et un dispositif élévateur (7) permettant de disposer une partie au moins de la structure de toiture escamotable (2) dans le logement de réception (5).
