Abstract (en)

[origin: EP2511463A1] The window (1) or door has a wing (3) moved between a closed position and an opened position relative to a fixed mounting unit (2). Damping devices (4, 5) are arranged on the fixed mounting unit for damping closing movement of the wing and provided with damping elements (6, 7) that are movably mounted on a cylinder or sleeve and moved against restoring force. The damping devices include housing, and the damping elements are arranged in or on the housing, which is fastened to a fitting portion (9) of a fitting assembly (8).
