Abstract (en)

[origin: EP2511811A2] Disclosed is a mobile terminal. The mobile terminal may include a communication unit and a controller. The communication unit may set up a wireless network with the display device. The controller may receive information related to a specific region, selected by a cursor in a screen of a display device, from the display device or transmit specific information to the display device by using the specific region as an interface window.
