Abstract (en)
The freight container has a metallic side door (12) and an antenna (10) which is secured on the side door for transmitting and/or receiving electromagnetic waves transmitted from a satellite in L-band frequency range. The electromagnetic waves of the antenna are linearly polarized in outer side of the side door, and are transmitted in perpendicular to the side door. The antenna is comprised with a rod-shaped radiating element.

Abstract (de)
Die Erfindung betrifft einen Frachtbehälter mit einer Antenne (10) zum Senden und/oder Empfangen von über Satelliten übertragenen elektromagnetischen Signalen, vorzugsweise im L-Band-Frequenzbereich, wobei die Antenne (10) außen an einem Seitenteil (12) des Frachtbehälters angeordnet und linear polarisiert ist.
