Abstract (en)

[origin: WO2011073035A1] The invention provides a Maillard flavor composition comprising a structured lipid phase, a polar solvent, different from water, and at least one Maillard reaction product. The invention concerns further a method for making said composition in a structured lipid phase using polar solvent different from water. The compositions are useful for enhancing the palatability of foods, dietary supplements, medicaments, and the like.
