Abstract (en)

[origin: US2011147152A1] A shoe storage insert for suitcases and the like containers within which shoes and other such footwear items are packed and protectively stored for travel purposes is provided. The insert may be designed to have the same general shape as the luggage within which it is to be used, and of a size which fits conveniently within the storage cavity of any standard size or custom luggage. The insert may have two panels each containing one or more pockets in which shoes can be placed. The pouches are arranged on alternating levels of each insert panel so that once the insert is closed it can lay flat within any standard suitcase.
