Abstract (en)

[origin: WO2011083019A1] The invention relates to a device for detecting a collision of a displaceable furniture part and an obstacle, comprising a controller (5) for a drive device for the displaceable furniture part, and a sensor (20) having a first sensor range (21) and a second sensor range (22), wherein a force and/or a relative motion arising between the first and second sensor parts (21, 22) can be detected.
