Abstract (en)
[origin: GB2476076A] A baby carrier 120 comprises a rear tie panel 136 and two crossed bandolier slings 141,142 which have ends 143,144 attached to the tie panel 136. The slings may be permanently secured to the tie panel, e.g. by sewing, welding or bonding [as shown in Fig 1A] , or the tie panel and the slings may be formed as a unitary body, for example by knitting. Alternatively the slings may be adj ustably secured to the tie panel using pairs of tie-down rings 151. The slings may be stiffened, for example by using a stay inserted into the sling, or by using starch [50, Fig. 1A]. Also disclosed is a baby carrier 22 comprising a pair of bandolier slings 61,62 which are joined together at a junction 70 by stitching or knotting without the use of a rear tie panel.
