Abstract (en)  
[origin: WO2011075660A1] A garden watering device (100) is configured for use in handheld and ground- based operation. The garden watering device (100) includes a device body (115) having a water inlet (105) and a handle (106). The garden watering device (100) also includes at least one water distribution member (101, 104) adapted to spray in multiple patterns. In one example, the at least one water distribution member (101, 104) includes an elongate tube (104) with a series of discharge outlets (102) and a multi-pattern head (101) with at least one flow outlet (110). The garden watering device (100) also includes a flow route selector (113) that routes water to either the elongate tube (104) or the multi-pattern head (101).
