Abstract (en)
[origin: WO2011072910A1] The invention is based on a handheld machine tool device, in particular for a drill hammer and/or a chisel hammer, comprising at least one vibration-absorbing device (12a; 12b), which has at least one absorber mass (14a; 14b), an absorber housing (16a; 16b) and at least one absorber spring (18a, 20a; 18b, 20b), wherein the absorber spring (18a, 20a; 18b, 20b) is provided to support the absorber mass (14a; 14b) on two opposing sides in the spring direction (22a; 22b). According to the invention, the absorber housing (16a; 16b) has at least one spring guide surface (24a; 24b), which guides the absorber spring (18a, 20a; 18b, 20b) in the spring direction (22a; 22b) in at least one operating state.
