Abstract (en)

[origin: WO2011072916A1] The invention relates to a hand-power tool comprising at least one oscillation-damping device (12a; 12b) that has at least one damping spring (14a; 4b), a damping mass (16a; 16b), and a mechanism housing (20a; 20b). According to the invention, the oscillation-damping device (12a; 12b) has at least two retaining parts (32a; 32b) that at least partly enclose the damping mass (16a; 16b).
