Abstract (en)  
[origin: WO2011072907A1] The invention relates to a hand-power tool, in particular a drill and/or chiseling hammer, comprising a transmission (12), a machine housing (14), and an inner housing (16) arranged within the machine housing (14), said inner housing being provided for at least partially receiving at least one transmission element (18) of the transmission (12). According to the invention, the at least one transmission element (18) is supported jointly by the inner housing (16) and by the machine housing (14).
