Abstract (en)
[origin: WO2011082721A1] The invention relates to a system for imprinting containers (B), such as bottles, with at least one printed image on at least one printing press (1) having at least one print head (11), wherein at least two printing presses (1) connected in series are designed as carousels for successively receiving the containers (B) to be imprinted and the containers (B) are transferred or taken from one carousel directly to a succeeding carousel.
