Abstract (en)  
[origin: WO2011080418A1] The invention relates to a thermoplastic container (1) including a body (2) in which at least one flank (9) is formed by indentation, including: a central area (12) having a concave profile in a longitudinal plane, and an adjacent area (13) longitudinally extending the central area (12) and having a convex profile in a longitudinal plane. The central area (12) and the adjacent area (13) are stiffened, and the junction between the central area (12) and the adjacent area (13) defines a deformable membrane (16).
