Abstract (en)

[origin: CA2828800A1] A spacer profile for use in a spacer frame (50) of an insulating pane unit, with a hollow profile body (10) which is formed from a plastics material and has a chamber (20), the hollow profile body extending in a longitudinal direction (Z) and having an inner wall (12), an outer wall (14), and a first side wall (16) and a second side wall (18) which are connected to the inner wall (12) and the outer wall (14) to form the chamber (20), and with a first and second reinforcing layer (22, 24) made from a metal material, which reinforcing layers extend on the first and second side walls (18) and partially on the outer wall (14) at a first distance (a1) from one another and have a first and a second thickness (d2), and with a diffusion barrier layer (26) which is formed directly on the outer wall (14) between the reinforcing layers (22, 24) and is connected to the latter in a diffusion-tight manner in order to form a heat-insulating diffusion lock (27).
