Abstract (en)

[origin: WO2011072782A1] The invention relates to a cam unit (1) for arranging on a camshaft main part (2) of a camshaft in a rotationally fixed and axially movable manner, comprising a tubular sleeve main part (11) and at least one cam element (12) that lies on the sleeve main part (11) in a rotationally fixed and non-movable manner. According to the invention, the sleeve main part (11) and the at least one cam element (12) are designed as individual parts that can be separately produced and subsequently assembled.
