Abstract (en)

[origin: WO2011073036A1] The invention relates to a method for setting functional parameters of a controller for a motor vehicle, wherein at least one target parameter is prescribed in a weighted characteristic map (40), wherein the target parameters represent a behavior of the motor vehicle, and wherein an association with a model of optimal parameters (32) is provided in the weighted characteristic map (40), so that predefined target parameters can be associated with a set of optimal parameters, set as the functional parameters.
