Abstract (en)

[origin: WO2011082990A1] The invention relates to a refrigerating device, in particular a domestic refrigerating device (3), having a door (1) with an inner door face, on which a door rack (1) is guided in a height-adjustable manner. The refrigerating device also has a detent device, by means of which the door rack (1) can be locked at the adjusted height. A slotted guide system (14, 16) is provided on the inner door face, said slotted guide system having at least one slot into which at least one sliding block (5, 6) that is connected to the door rack (1) engages and which has at least one first slot section for guiding the door rack (1) in a height-adjustable manner and at least one second slot section that forms the detent device. The sliding block (5, 6) that is connected to the door rack (1) engages into said second slot section in order to lock the door rack (1) at a specified height.
