Abstract (en)

[origin: WO2011072869A1] In order to design a plug element (2), in particular a so-called small form-factor pluggable connector, having a reliable, effective and easily mountable locking mechanism, the arrangement of a locking element (22) and an actuating element (20) inside a housing (8) of the connector element (2) is provided. The locking element (22) comprises a detent element (44) for latching and locking with a mating piece (6), into which the connector element (2) can be inserted to form a lockable plug connection. The actuating element (22) comprises a grip part (24), which is guided through a first opening (28) through the housing (8) to the outside.
