Abstract (en)  
[origin: WO2011083029A1] The invention relates to a connecting line (10) having at least two conductors L for monitoring a supply voltage and having two further conductors P conductively connected to each other at a first end and comprising a measurement device (30) for measuring the resistance of a measurement circuit having a protection line PE and measurement line P at the second end, wherein a warning signal is output if the resistance is exceeded.
