Abstract (en)

[origin: EP2345479A1] The hammer mill has a lockable milling chamber (2) and a rotor (10) disposed in the milling chamber, where the rotor has a rotor shaft (11), multiple rotor disks (12,18) dividing the rotor into multiple sections (15,15'), and multiple hammer pins (20) for receiving hammers (23) or hammer packets. The hammer pins are not extended over all sections. Independent claims are also included for the following: (1) a collecting device for collecting hammers of a rotor of a hammer mill; and (2) a locking device for locking a rotor of a hammer mill.
