Abstract (en)

A bag (2) for pharmaceutical products is gripped by a gripping member provided with two jaws (6, 7) movable between a gripping position and a releasing position of the bag (2), with a recess (19) obtained between the two jaws (6, 7) to accommodate therein at least one duct (4) to access the content of the bag (2), and with a support pin (20) protruding into the recess (19) to allow the access duct (4) to be folded from a substantially rectilinear, initial configuration to a final configuration, where the access duct (4) is folded about the support element (20) itself.
